

UNIVERSITÀ
DI CAMERINO

Camerino 9th Ottobre 2017

TO WHOM IT MAY CONCERN

I write in my capacity as Director of the School of Biosciences and Veterinary Medicine of the University of Camerino and as coordinator of the research group of molecular parasitology. I hereby certify that the insectarium present in our department is qualified to carry out experiments with mosquitoes.

Consequently the experiments carried out by “Biovecblok” to assess the role of repellent light emitted by TRILED Baesten product to control mosquito vectors are in accordance with all the experimental activities performed in insectarium of the Camerino University.

With my Warmest Regards

Guido Favia
