Preparation for use

① Mobile phone is connected to Wi-Fi

Smart phone   Wi-Fi wireless router LAN port   Smart Gateway

Ensure that the product is within the effective coverage of the smart host (gateway) ZigBee network to ensure an effective connection between the product and the smart host (gateway) ZigBee network.

*Make sure the smart host has been added.

Preparation for use

② Download and open the App

In the App Store, search for "Smart Life" or scan the QR code on the package/manual to download and install the smart App.
If you are downloading this App for the first time, please tap the "Register" button to register your account; If you already have an account, click the "Login" button.

Network settings

● Load battery to the device while ensuring that the phone is connected to the network and the smart gateway has been added successfully;

● Open the App and tap "Add sub-device" on the "Smart gateway" screen. Then，select "Door and window sensor";

● Press and hold the reset button for 5 seconds, until the network indicator light begins flashing. Follow the App instructions to add the device.

Reset network button

● Once the device has been successfully added, you will be able to find the device in the "My home" list.
